

BUSINESS PHONE SYSTEMS

Reliable communication is a lifeline to maintain efficient operations and avoid costly complications. Whether your business is seeking to expand or install a phone system, we custom-design scalable business telephone systems from the most trusted brands in the market. Whether its traditional, hybrid, voice-over-IP (VoIP), or hosted systems, we design your solution to keep you accessible to your clients while you receive our high quality customer care.

INTERNET & VOICE

We take a true consultative approach to providing multi-vendor voice and Internet solutions to help your business meet its goals and resolve challenges. It starts with understanding your objectives, analyzing and auditing your current services, and providing technology that is central to today's advanced communication requirements.

ADDING, MOVING OR CHANGING TECHNOLOGY

Whether you are looking to add new technology, relocate your entire business, or change your existing telephone or data network, you need professional help to make sure all the details are considered and the project is accomplished as efficiently and cost-effectively as possible. Let us help you with an office move, technology refresh or any network updates you may need.

MANAGED IT SERVICES

Managed IT Services offer monitoring, maintenance, and technical support for your entire network — vastly reducing downtime and support costs. Get ahead of issues and work on improving systems rather than just plugging holes. With Managed IT Services, we act as an extension of your team — an ideal benefit for those with a small, or no, internal IT department.

CABLING

Our team will design and install a customized cabling solution for today that maximizes your efficiency and stays scalable as you grow tomorrow. We are properly licensed, bonded and insured and our Structured Cabling voice/data/WiFi installations are installed by BICSI certified technicians adhering to industry standards and budgets without over- or under-building.

CLOUD SERVICES

If you are considering moving all or part of your business to the cloud, we can help. Our specialists will work with you to evaluate your needs, suggest a migration path and architect a plan to ensure you find the best cloud "fit" as your business scales and grows.

VIDEO SURVEILLANCE

We work with your team to design and install a video surveillance solution to meet your specific business needs. We offer a myriad of video surveillance options ranging from analog cameras and storage devices to full IP camera and DVR/NVR solutions with remote access and instant image sharing.
