Copper State Communications

ATTN: **Scott Kerbaugh**, Structured Cabling Sales Manager
CC: **Mike Wilson**, Sales Engineer, **Dave Gilson**, Cable Infrastructure Supervisor
CSC Installation Technicians (Lupe, Markas, JR, Jose, Aaron and others)

Copper State Communications,

On behalf of the entire CCV IT team, we wanted to author this Letter of Recommendation for your Structured Cabling team as for the past 2 years, you have been instrumental "behind the scenes" for us not only getting our main Peoria Campus offices and the projects at our East Valley Campus cabled - but for cabling our entire Surprise and Anthem locations!

At CCV it is our mission to WIN people to Christ,
TRAIN believers to become disciples,
and SEND disciples to impact the world.

Our Mission success has resulted in our growth and expansion to be exceptional – and often unpredictable – and Copper State Communications has always made accommodation to assist us even in our odd hours and last-minute requests. From Voice and Data cabling to even Video Surveillance Camera cabling, the team has responded!

As a church, we have to be very astute to not only the project budgets, but even more importantly the quality of workmanship, as we have to be able to "communicate" our message. We've tried "cheaper" contractors in the past, however Copper State Communications has been an outstanding VALUE (price to performance ratio) to CCV.

We recently noted that **both Christ's Church of the Valley and Copper State Communications began their quest in 1982** and the longevity of both entities in seemingly "volatile" industries speaks volumes for each other. As God's plan has us growing to share His message, we look forward to engaging Copper State Communications with future projects to engage their quality of people, products and services that Copper State Communications has provided to CCV these past few years.

Chris Holub
IT Director
