Copper State Communications

ATTN: **Scott Kerbaugh**, Structured Cabling Manager

CC: **Doug Bingham**, Operations Manager, & **Fred Szyndlar**, Installation Technician

Gentlemen,

We just wanted to show our appreciation for your efforts in assisting our Tucson Office with their cabling reconfiguration project in February of this year.

As a premier U.S. security company providing a full range of physical security services to Government, Commercial, and Fortune 100 customers in several geographic markets on four continents – having a reliable communications infrastructure is vital to our success. Copper State's ability to quickly address our needs and install an operational infrastructure in a timely fashion and working with Fred was as pleasurable experience as we could have hoped for.

Additionally, it was an added benefit knowing about Copper State's experience working within sensitive environments as Inter-Con is a major provider of security services to Local, State and Federal Governments as well as our diverse Commercial customer base world-wide.

When presented with another structured cabling opportunity in the future, we will not hesitate to call Scott and Copper State - and they exceeded our expectations previously and will look forward to similar results. Great job Scott!

I look forward to working with the Copper State team on more projects in the future!
